

# Sustainable Urbanism

## Julio Cesar Perez Hernandez

Harvard University Loeb Fellow'02, Chair Cuban Chapter CEU and INTBAU,  
Architect and Urban Planner

*Sustainability encompasses the whole human activity so when it comes to place making a holistic approach must guide the analysis and provide the necessary frame that takes into account both*

*tradition and innovation to create healthy places with economic balance and social integration. It must reconcile human needs with ecological imperatives. A Master Plan for 21st Century Havana aimed at preserving the city's historic, urban and architectural legacy and also at encouraging its future urban and economic development expresses the author's vision for the future of the only Caribbean Metropolis with a European influence.*

**Tuesday, October 26, 2010**

**6:30pm**

**Porter Hall 100 (Gregg Hall)**

Co-sponsored by the School of Architecture  
and the Steinbrenner Institute for Environmental Education & Research (SEER)
